  WazirX - now global :earth_africa:
  The official announcement channel of WazirX - Building India's most trusted cryptocurrency exchange
- Warren Pfeffer (UNESGE199)WP

  I added this but when I brought up the server it failed with this message: for handler handshake
  mining of URI https://t.me/handshakemining. ValueError: No user has "handshakemining" as username
  So I removed handshakemining and everything is fine now, I assume handshake mining channel was terminated?
